

Rx CLEAR ULTRA MINERAL REMOVER

Rx Clear Ultra Mineral Remover is a non-toxic, non-phosphorus formulation for control and prevention of scale and metal staining in swimming pools. When applied as directed, Ultra Mineral Remover is compatible with all swimming pool surfaces and other treatment chemicals.

DIRECTIONS FOR USE

Initial Application:

1. Add 1 quart of Rx Clear Ultra Mineral Remover to 10,000 gallons of pool water, by pouring into the skimmer or around the perimeter of the pool while the circulation pump is on.
2. This initial application may deplete the chlorine level in your pool. Following application, test the free available chlorine and adjust accordingly.

Maintenance Application:

For calcium hardness levels less than 300 ppm:

Add 6 ounces per 10,000 gallons of pool water once a month.

For calcium hardness levels greater than 300 ppm:

Add 6 ounces per 10,000 gallons twice a month.

FIRST AID

If in eyes: Flush thoroughly with water for 5 minutes. If irritation develops, contact a physician.

If on skin: Wash contacted area with soap and water.

If swallowed: Drink several glasses of water. Obtain medical attention if gastrointestinal irritation occurs.

If inhaled: Remove to fresh air.

NOTE: Although this product is non-toxic, gloves and appropriate eye protection are recommended when handling.
